# Farm Mapping Service

An accurate and detailed farm map is an extremely useful farm management tool, yet many farm businesses do not have the time or the resources to prepare one.

Farm maps can be used to...

- Plan paddock and cropping rotations.
- Develop farm plans including fencing, drainage, tree planting and earth works.
- Provide information for employees, contractors and farm advisers.

eAgribusiness offers a farm mapping service using geo-referenced and ortho-rectified aerial photography\* to produce digitised farm maps with accurate areas and distances. (\*Contact eAgribusiness if you require a quote for aerial photography)

Digitised farm maps produced by eAgribusiness...

- Include farm, paddock and arable area layers.
- Are ready to use in any iFarm software product.
- Can be reproduced as large wall mounted maps up to 1 m x 1.4 m in size (contact eAgribusiness for more details).

Order your digitised farm map TODAY. Simply forward your order and payment to eAgribusiness.
